

# CarePages and GetWellNetwork: Partnering to Offer an Integrated Solution

## CarePages and GetWellNetwork solutions can:

- Enhance communication offerings for patient families
- Expand CarePages access for patient families to receive emotional support from loved ones
- Encourage utilization of the GetWellNetwork education, feedback and entertainment services
- Improve Patient Satisfaction, Quality of Care and Service Delivery

### Connecting Two Leading Patient Care Services

As leaders in patient care technology, CarePages and GetWellNetwork understand how to improve the patient experience. The two services have exclusively partnered to offer hospitals an integrated solution to empower, educate and connect patients and families to drive improved patient care and service. Through the combined offering, patient families are now able to create and access their personal CarePage through the GetWellNetwork solution at the patient bedside during a hospital stay.

### GetWellNetwork® PatientLife:)System™

GetWellNetwork PatientLife:)System enables hospitals to transform patient care by turning in-room monitors into an interactive experience. With the GetWellNetwork solution, you can:

- Automate delivery of patient specific health information
- Free nurses from administrative and non-clinical tasks
- Monitor patient satisfaction in real-time
- Meet industry standards for education, safety and record keeping
- Engage patients with home-like features and amenities

### CarePages

CarePages offer a free, personalized, private Web page that provides patients and families a better way to share information about their condition with loved ones and to learn about your hospital services. CarePages is proven to deliver:

- Increased satisfaction with overall quality of care by more than 30%
- Brand marketing value between \$70,000 - \$350,000 annually
- Improved staff satisfaction through CareCompliments
- Identification of prospective donors and increased pool of future major gifts
- Feedback that provides an opportunity for early identification of risk management issues
